

EAGLE LOC 900™

INTERNAL JOINT RESTRAINT SYSTEM

Eagle Loc 900™

Eagle Loc 900 is JM Eagle's internal joint restraint for potable water distribution, as well as sanitary sewer force mains. Gripping the joint from the inside of the pipe, Eagle Loc 900 eliminates the need for external joint restraints and connects with an unmatched hold.

Better Engineered than Traditional Restraints

	EAGLE LOC 900	CONCRETE THRUST BLOCKS	EXTERNAL RESTRAINTS	OTHER INTERNAL RESTRAINTS
Reduces labor up to 30 times	✓	✗	✗	✗
Requires no tools, rods, clamps, bolts or splines	✓	✗	✗	✗
Installs with a snap	✓	✗	✗	✗
Allows for less digging and smaller-diameter steel casings	✓	✗	✗	✓
Doesn't interfere with existing infrastructure or future digs	✓	✗	✗	✓
Prevents corrosion	✓	✗	✗	✓

Horizontal Directional Drilling

Eagle Loc 900 drives costs down!

The superior strength of Eagle Loc 900™ makes it the perfect choice for trenchless applications. Strong enough to withstand pullback, even over longer pull distances, Eagle Loc 900™:

- Can go in high water tables and acidic soils.
- Fits in hard-to-reach areas where utility lines are present.
- Minimizes labor-intensive open-cut digging and trenching.
- Eliminates the need to pre-fuse the entire length of pipe.

Meets AWWA C900, ASTM D1784 and UNI-B-13 Million Cycle Test.

You Haven't Seen Strength Until You've Seen Eagle Loc 900™

STRONG ENOUGH FOR ALL YOUR APPLICATIONS

Open Trench

Less digging to accommodate external restraints and less time in the hole due to snap-together technology result in faster and less expensive installations.

Horizontal Directional Drilling

Requires no special fusing equipment. Perfect for hard-to-reach spots, high-traffic areas and wet soils, the fastest and least-labor-intensive installation method!

Road Bore

Decreases the profile of traditional external restraints, allowing for smaller steel casing and smaller footprint in the right of way, as well as easier pull-out.

Strong enough to lift this 54,000-pound bulldozer!
