IMPROVED PRODUCTION AND DISTRIBUTION OF PURE-CORE®

JM Eagle™ is pumping up production of its Pure-Core® product, with lines now running at its Magnolia, Ark., plant.

The lines for Pure-Core®, a flexible high-density polyethylene pipe for waterlines and irrigation, were moved from the Hastings, Neb., plant. This production will continue to cover the Midwest territory.

“The production lines at the Magnolia plant will provide better efficiency,” says JM Eagle™ Director of Sales for Irrigation and Plumbing Rick Sheppler. “It is a better match for the nature of the product and the distribution channels.”

Pipe is available for shipping now from the Magnolia plant, and inventory will stay high to get it to all of the customers who need it, when they need it.

“We appreciate customers’ patience while we make this transition,” says Sheppler. “We are confident that the additional lines at the Magnolia plant, combined with our commitment to service, will more than accommodate customers’ orders and exceed their expectations.”

For more information about Pure-Core®, contact Rick Sheppler at ricksheppler@jmeagle.com or (858) 578-6174.
