JM EAGLE LIGHTS UP MARKET WITH ELECTRICAL FITTINGS IN EASTERN U.S.

JM Eagle customers in the East will now have access to the full range of products for the electrical market, as the company begins production and distribution of electrical fittings in that part of the country.

Slated to roll out of the Adel, Ga., plant on June 1 are the complete assortment of PVC fittings, including schedule 40 fittings, schedule 40 and 80 standard radius elbows, special radius sweeps, boxes and couplings.

"JM Eagle customers in the West have enjoyed the company's expansive array of PVC fittings for several years," says JM Eagle Electrical Fittings Manager Michael Lang. "We are excited to extend the full-line electrical solution to the rest of the country."

JM Eagle's extensive line of electrical fittings complements

its full range of PVC electrical conduit and gas line products. These include schedule 40 and 80; DB (direct burial) 120, 100 and 60; Type C and gas sleeve. JM Eagle also offers an HDPE interduct product.

"From the pipe to the fittings, customers in the East can now make one call to get all the electrical products they need in one order," says Lang. "Now JM Eagle is the complete supplier for all of their electrical-construction needs."
