

THE TRUTH SPEAKS VOLUMES CUSTOMERS COMMENT ON QUALITY FOR JM EAGLE AD

It's time the truth be told about JM Eagle quality, and customers across the country have lined up to do the talking.

A new JM Eagle full-page advertisement, titled Thoughts About Our Quality, will appear in Monday's industry press. It features a long list of testimonials from JM Eagle customers who have been pleased with the company's products and service.

"It is rewarding to see that our dedication to high quality is recognized by our loyal customers," says JM Eagle President and CEO Walter Wang. "They see our pipe day in and day out, and they can verify that we manufacture an excellent product that meets even their high standards."

Testimonials include, "We have always found JM Eagle pipe to be completely reliable," and "We have pur-

chased hundreds of miles of pipe from JM Eagle and I cannot recall a single instance of a pipeline failure with their product."

Several customers quoted have been doing business with JM Eagle for more than 25 years. They are some of the most high-profile members of the industry. The ad also lists the standards met by five of JM Eagle's best-selling PVC products.

"There are no better witnesses to the condition of our products than our customers," says Wang, "and we are grateful that they came forward to attest to the fact we are committed to quality."
