

Paseo Del Mar

■ Location:

San Pedro, Calif.

■ Pipe Used:

36-inch IPS DR 21 HDPE

■ Quantity of Pipe:

300 feet

■ Type of Project:

Bypass lines to replace 96-inch concrete pipe washed into the ocean by heavy rains. Two 150-foot-long HDPE lines, selected for their water-tightness and flexibility, were connected to the concrete and run side by side down the steep slope for storm water drainage.

■ Duration of Project and Pipe Installation:

November 2011
